

Hospital Presumptive Eligibility (HPE) allows hospitals to enroll eligible individuals in temporary Medical Assistance (MA) on-site during a hospital visit. HPE is a pathway to longer-term MA based on minimal eligibility information. Hospital employees make eligibility determinations for applicants based on limited, self-attested income and demographic information. HPE participants receive temporary Medicaid benefits while they apply for full MA coverage. If approved for full MA coverage, they transition into full Medicaid enrollment. HPE populations include children, parents and caretakers, single childless adults under the age of 65, and pregnant women.

Program Background

- Maryland Medicaid implemented the HPE program in October 2014.
- HPE participants receive full Medicaid benefits, but are not enrolled with a Managed Care Organization (MCO).
- In addition to hospital visits, HPE participants have coverage for services from physicians, pharmacies, and other participating Medicaid providers in the community.
- Temporary HPE benefits last between one and two months.
- Hospitals are responsible for assisting HPE participants with the full MA application.
- Maryland receives a 50 percent federal match on HPE enrollees, and an enhanced match for enrollees that convert to full MA coverage.

Participating Hospitals

- 36 total hospitals are enrolled in HPE.
- 29 have completed the Hospital Presumptive Eligibility training and can submit applications.
- 19 have submitted at least one application since October 2014.
- 8 are actively & continuously submitting applications.

Enrollment (October 2014 – March 2016)

- Total HPE applications submitted: 4,217
 - **Approved: 4,013 (95 percent)**
 - Denied: 204 (5 percent) – Most denials due to duplicate applications.
- HPE enrollees transitioned to full MA: **73 percent**
- **Approximately 21 percent of HPE participants who have transitioned to full MA coverage are new to Maryland Medicaid.**

Application data reflects start of program through March 27, 2016.

HPE Hospitals

- **36 total hospitals are enrolled in HPE.**
- 29 have completed the Hospital Presumptive Eligibility training and can submit applications
- 19 have submitted at least one application since October 2014
- 8 are actively & continuously submitting applications.
